[Monthly SEO](#) is a simple yet effective way of promoting your website on the search engines. You give Monthly SEO your domain name and the keywords that you want to be found for and they do the rest. They write unique articles around your keywords and publish them on a network of websites that have proven to help with the search engine rankings of other clients. Then all you have to do is wait just a few weeks. Some times just a couple of weeks, and then you can see the impact that these articles have. Written in a specific way that the search engines like, they add credibility to your website for you keywords. The result being higher rankings for your website.
